COMPUTER HARDWARE ENGINEERING (3 year diploma) **first class**

EGOVT. HSS KANNADIPARAMBA KERALA   **2016 - 2018**
PLUSE TWO COMMERCE

PROJECT

CARTWISE - **e-commerce platform**

- It's an online platform for purchasing a variety of laptops . The backend was built on **Express.js**, **Node.js**, with **MongoDB** following the **MVC** architecture.

- Payment platforms like **Razorpay** have been seamlessly integrated.

- **Nodemailer** is utilized for OTP-based authentication.

- The platform is hosted on **Amazon Web Services (AWS) with NGINX**   source Code

WANDERINN- **Hotel Booking Web app**

- This platform is designed to streamline the process of finding and booking accommodations, saving you time and ensuring a comfortable stay.

- By utilizing the **MVC** architecture, this was developed with **React.js** with **ContextAPI** for the frontend and **Node.js** for the backend.

- **Mongoose** is employed for defining the schema.
- Payment platforms like **Stripe** have been seamlessly integrated.   source Code

MINI PROJECT

NETFLIX CLONE

Developed a Netflix clone using **React.js**, with real-time movie data fetched from the **TMDB API**. The application replicates key Netflix features, view movie details**.** source Code

OLX CLONE

Developed an OLX clone using **React.js** for the frontend and **Firebase** for the backend, ensuring secure data transfer through **JWT** (JSON Web Tokens). The application enables users to post listings source Code
